Professional Summary

I am a software engineer specifically a backend Developer with more than 3 years of experience in building robust server-side applications. Skilled in API development, database management, and system integration. Known for strong communication, teamwork, adaptability, and a continuous learning mindset. Passionate about delivering secure, high-performance backend systems that support scalable web applications.

Technical Skills

- **Languages**: Node.js, Python
- **Frameworks**: Express.js, Flask
- **Databases**: PostgreSQL, MongoDB, MySQL, ImmuDB
- **DevOps Tools**: Docker, Git, Jenkins, Kafka
- **API Design**: REST
- **Cloud**: AWS, k8s

Soft Skills

- Strong communication and documentation skills
- Team collaboration and cross-functional teamwork
- Analytical thinking and problem-solving
- Time and task management
- Adaptability to new tools and environments
- Attention to detail and accuracy
- Ownership and accountability
- Eagerness to learn and grow continuously

Professional Experience

Backend Developer
Dan Energy Ltd. - Onsite
October 2022 – April 2024

- Developed and maintained internal backend systems used by the company for operations such as employee management, reporting automation and others.
- Collaborated closely with system designers and frontend developers to support development progress, ensuring seamless system integration and user experience.
- Provided ongoing technical support during implementation phases, assisting teams in resolving real-time deployment issues.
- Led efforts to maintain and upgrade backend services based on internal feedback, continuously improving performance and functionality
- Assisted junior developers who joined the company by providing onboarding support, code guidance, and best practice mentoring.

Automation Engineer
Bruhati IT Solutions – Remote
October 2023 – April 2024

- Developed automation systems tailored to solve complex, real-world business problems across internal company operations, leading to increased efficiency and reduced manual effort.
- Designed and implemented scalable, maintainable solutions that streamlined workflows, minimized errors, and supported long-term business growth.
- Demonstrated strong remote collaboration skills by proactively communicating with distributed teams, managing tasks independently, and consistently meeting project deadlines without supervision.
- Maintained clear documentation, shared progress transparently, and contributed to a positive remote work culture by actively supporting teammates and participating in virtual stand-ups and reviews.
- Combined technical expertise with adaptability, problem-solving, and ownership to drive automation projects from concept to deployment in a fully remote environment.

Senior Backend Engineer
Eaglelion Systems Solutions – Onsite
April 2024 - Present

- Developed automation systems for fintech and entertainment clients, improving efficiency and accuracy.
- Automated transaction validation and fraud detection in fintech, reducing processing time, errors and meeting industry standards.
- Built content scheduling tools for entertainment, optimizing streaming workflows and user engagement.
- Designed scalable solutions to handle high transaction volumes and large media assets.
- Worked closely with cross-functional teams to translate business needs into technical solutions.
- Supported deployment and ongoing improvements based on user feedback.
- Mentored junior staff and fostered effective team collaboration in a fast-paced environment.
